REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The primary reason for allowance is a combination of applicants' arguments submitted July 23, 2004 and the examples set forth in the primary reference, Sugaya et al. In the Final Rejection the Examiner argued that Sugaya teaches that Sugaya's element M is selected from Group 3A of the Periodic Table which includes Al and B which are encompassed by applicants' element M. In the response submitted July 23, 2004, applicants have argued that Sugaya, when referring to the element M as selected from Group 3A of the Periodic Table, is referring to the old IUPAC Periodic Table system and not to the CAS system. Based on Sugaya's examples the Examiner agrees. Each of Sugaya's example alloys contains Y, Sc and La as the element M (see Sugaya, page 26, Table 1). Thus, Sugaya's disclosure that M is selected from Group 3A of the Periodic Table does not mean elements such as B and Al (based on the CAS system) as the Examiner argued in the Final Rejection but rather means Y, Sc, Ac and La (based on the old IUPAC system) as applicants have argued. Accordingly, there is no overlap in the instantly claimed element M and Sugaya's element M and thus applicants' claims are not obvious in view of Sugaya.
2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
